

## KUMDC's Tech Time

August 2018

Issue 2

*A monthly guide to free helpful apps for students available on smart phones, tablets, and computers.*

### GeoFlight USA

This app offers a super interactive way to learn and practice geography skills. Through games and challenges, you can learn states, capitals, cities, and more!

### BrainPOP Featured Movie

Check this app every day for a new video about current events, history, holidays, famous figures, or more. Interactive and designed with students in mind!

### iTunes U

This is not only a great resource for teachers to organize lessons, it also provides students with several international libraries right at their fingertips.

### myHomework

This app will help you to stay organized in school. Set reminders and can be synched across all of your devices for access when you need it.

### Star Chart

Have you ever wondered how to track the stars at night? With this app learn more about astronomy and everything around the night sky.

### Instructables

Anyone who enjoys creating things or do-it-yourself activities needs to try out this app! When you can't find the "instructable" you're looking for, create your own!

### Endless Numbers

Any students working on early number skills and identification needs to try Endless Numbers!

This app makes learning fun with interactive games and activities.

### Khan Academy

If you need extra practice studying or practicing specific academic skills, Khan Academy can help - offering videos and lessons for even advanced subjects.

### Otsimo

This app offers a variety of games in mutiple academic, life skills, and core skill areas. The best part is new games are being added all the time!

### Fabulous

Do you ever have trouble setting goals and keeping to good habits? Fabulous can help you achieve your goals and stick to habits that better your well-being.
